

## Redefining the pedagogical landscape: methodologies in art therapy research education

**Dominik Havsteen-Franklin, UK**

**Marián López Fdz. Cao, Spain**

**Unnur Ottarsdottir, Iceland**

**Mimmu Rankanen, Finland**

**Dafna Regev, Israel**

**Celine Schweizer, Netherlands**

**Unnur Ottarsdottir:** Research through art: art therapy research, grounded theory and drawn diagrams

**Marián López Fdz. Cao:** How intervention and investigation can work together (the interplay between art-making and empirical investigation, the symbiotic relationship between research and clinical practice)

**Mimmu Rankanen:** Interdisciplinary context and cooperation as an approach to art therapy research education

**Dominik Havsteen-Franklin:** Emerging paradigms in art therapy: the future of research and application in MA art therapy education

**Dafna Regev:** Supervising graduate students in research conducted in a research clinic

**Celine Schweizer:** Arts therapies student's research attitude in each part of the AT education programme

This roundtable aims to scrutinise the diverse methodologies in art therapy research, conceptualised as a 'rainbow spectrum.' Rather than limiting the discussion to formalised programs, the session will examine the broader pedagogical implications for research education in the field. Through interdisciplinary dialogue, participants will discuss how these methods elucidate the complexities of therapeutic interactions. The overarching goal is to

foster a more inclusive and adaptive research education landscape, enhancing both theoretical understanding and practical applications across various educational levels in art therapy.

The discussion seeks to convene a group of art therapy researchers and educators for an in-depth exploration of the educational landscape surrounding art therapy research within academic institutions. This dialogue aims to evaluate the current pedagogical strategies, methodologies, and emerging trends in the field. The panelists will offer valuable insights from their scholarly and practical pursuits, focusing on key thematic areas such as the structural components of art therapy research education, the nuanced role of non-participatory observers, the interplay between art-making and empirical investigation, the symbiotic relationship between research and clinical practice, and the vital importance of cross-disciplinary partnerships.

Through this collaborative discourse, attendees will acquire a nuanced understanding of the complexities and opportunities inherent in art therapy research education. The interactive nature of the roundtable aspires to not only inform but also inspire participants, catalyzing innovative approaches to enhancing the field's contributions to mental health and well-being. By fostering an environment conducive to the free exchange of ideas, this roundtable aims to serve as a pivotal moment in the ongoing evolution of art therapy research education at universities.

## **Biography**

**Prof. Dominik Havsteen-Franklin** is a clinical academic at Brunel University specializing in arts-based healthcare interventions. He holds international leadership roles, including Vice President of the European Federation of Art Therapy.

**Prof. Marián López Fdz. Cao** is a faculty member at Complutense University, specializing in art therapy and social inclusion. She leads research groups, holds multiple awards, and serves as Vice-president of EArTE.

**Dr. Unnur Ottarsdottir** is an art therapist, artist, and researcher at the Reykjavik Academy in Iceland. Her research interests include art educational therapy, memory drawing, and various ways of drawing for research and well-being.

**Prof. Mimmu Rankanen** is a professor at Oslo Metropolitan University with extensive teaching and research experience in art therapy. She's a psychotherapist and educator, focusing on adult mental health and supervisory roles.

**Dr. Dafna Regev** is an art therapist and associate professor at the University of Haifa, Israel, specializing in child and parent-child therapy. She heads the Art Therapy M.A. Program and conducts research.

**Dr. Celine Schweizer** is an art therapist and researcher in the Netherlands, focusing on autism spectrum disorders. She leads multiple research projects, and actively contributes to EFAT committees.
